

Women's health services

at Union Wellness Centers

We get it, women's health is different.

Our team of experts recognize the unique healthcare needs women experience over their lifetime. Women are more likely to be diagnosed with certain diseases, and symptoms may be different. We'll check for problems even before you may notice symptoms.

Our services include:

- Gynecological exams
- PAP and pelvic exams
- Testing for sexually transmitted infection
- Pre-contraceptive counseling information
- Family planning
- Support through the stages of menopause
- Breast exams, referrals for mammograms and education on breast health
- One-on-one health coaching
- Post-partum information

Please check with your local center for service offerings.
